SEARCH RESULTS LIST

The following is a complete list of the results we have checked the above against – we may have found more results but excluded them based upon them not being likely matches.

The Yoono Score is our algorithms way of ranking the accuracy of the content that we find. It's rated on a 1 to 10 scale - The higher the score the more likely the match is to the person you are searching for.

Your Yoono report will contain everything that we have found about the individual that you searched for that is in the public domain online in Google. However, we do not review the content of Social Media accounts Facebook, Twitter, Instagram, etc but provide you links to the individuals sites if our engine finds them.

The accuracy of the report is determined by the accuracy of the information that you put into the search form. Yoono only presents the information that it finds in easy to read sections. Yoono does not interpret the results and makes no comment nor recommendations on the information.

It is your responsibility to check the accuracy of the information in the report, contextualise the information, check the links and make your own decisions.
